

Profil. Das Bioglobe Labor für Medizinische Genetik ist eines der renommiertesten und fortschrittlichsten Labors für molekulardiagnostische Dienstleistungen in Europa. Ein hoher wissenschaftlicher Standard, Zuverlässigkeit und Genauigkeit, kombiniert mit kompetentem Service, haben bei uns höchste Priorität.

Profile. Bioglobe is a life science company providing services in all fields of life sciences. It is one of the best-equipped private laboratories of its kind in Europe. Bioglobe is located close to the campus of the University Hospital Hamburg-Eppendorf. The highest priorities of Bioglobe are high scientific standards, reliability and accuracy combined with competitive services. Our highly versatile laboratory and its personnel enable us to fulfil a variety of mandates tailored to our customers' needs. Customers who use our services have access to leading-edge technology and highly qualified personnel.

Products and services. Medical Genetics. The Molecular Genetic Laboratory of Bioglobe is a leader in the field of molecular diagnostics. Integrated in a network of co-operations with physicians, we offer a large number of DNA-oriented tests for many medical fields.

Life Science Technology Services for Research and Development. Bioglobe offers a complete solution to all research needs of biotechnology enterprises as well as those of universities and academic research groups. The service that we offer starts right from technology consulting, includes support to all types of molecular biological experiments, genomics, proteomics etc.

Science Guards – Predictive Genomic Profiles from Bioglobe. Assessment of genetic risks is the scientific basis for preventive biomedicine.

Core competencies. Automated High-Throughput Genotyping. Capillary Sequencing |aldi-ToF Mass Spectrometry | Real-Time PCR | Micro – Array Analysis

High-Performance Services. Medical Genetics | Molecular Diagnostics | Quantitative Gene Expression Profiling | Multiple Pathogen Typing | Methylation Pattern Analysis

Scientific Consulting. Medical Expertise | Molecular Genetic Expertise | Technical Expertise | Bio-Informatics Expertise | Complex Project Expertise

Cooperation arrangements. BluBioTech Int. | Congenics AG | Dr. Storm In Silico Analyse | ELGA Biotech | GENEART AG | Verein zur Förderung der experimentellen und molekularen Endokrinologie keme e.V. | Medizinisches Präventions Centrum (UKE Hamburg) | TuTech Innovation GmbH | Science Support – Serviceleistungen für Wissenschaft und Forschung | Vaccine
